## Terminals (Screens)

Luke Bryant - 2025-07-29 - [Hardware \(Open\)](#)

QUICKPARKING

**In this document you will see a selection of the customer facing messages that can be viewed on the IN, OUT and PAY Terminals at Quick Parking locations.**

The terminals in use within the Quick Parking system use Windows 7 Embedded to handle operations. This generally means that there is a customer facing screen (seen within the screenshots below) and a standard view Windows screen (hidden from customer view) where settings can be adjusted when needed.

### **Standard Entry & Welcome Screen for on site terminals:**

### **Welcome Screen with Language Selector:**

### **PAY Terminal - Successful Payment Screen.**

### **OUT Terminal - Already Paid Screen.**

### **IN Terminal - Already Paid Screen.**

### **PAY Terminal - Payment Failed.**

### **IN Terminal - Unknown Booking Code.**

IN Terminal - Not Paid.

Thanks and regards,

The Quick Parking Support & Assistance Team
